Keeping Your World Connected™

MediaHub™

Today's guests check-in with their own... **in-room entertainment**

Introducing... **the MediaHub entertainment panel series**

Today's guest checks-in with all their personal electronics and they want to use them. They want to watch their own TV shows and movies, play their own games, and listen to their own musical selections. Whether they're stored on an iPod, MP3 Player or on a laptop, your guests want to access them, and now they can. The MediaHub lets you **...plug them in.**

The MediaHub completes the in-room entertainment system. Our easy-to-use, low-profile connection panel acts as a gateway to your guest's personalized in-room entertainment. Guests plug their electronics into the panel turning the TV into a giant viewing screen, or the in-room stereo system into their own personal sound system. There is even a battery charger.

These beautifully designed products feature trim options to fit any decor and mounting options to solve even the most challenging room configurations.

For more than 15 years the hotel industry has turned to TeleAdapt for coming trends in guest technology. Today's hotel guests want to plug in **...be the hotel that lets them.**

Table of Contents

- 6 | **MediaHub Cable Accessories**
Individual cables or guest kits.
- 7 | **MediaHub Mounting Options**
Mount alone or attached to the TV.

All MediaHub products are available **in a variety of styles and trims**

MediaHub HD™

Guests can stream audio through the TV ...**wirelessly**

MediaHub HD is an exciting next step forward in guest entertainment for the hotel industry. Bluetooth® technology allows A2DP-enabled cell phones, laptops, or MP3 players to wirelessly stream audio through the TV speakers. Guests can fill their room with the sound of their own music without leaving their device tied to the TV.

Like the MediaHub Active, the MediaHub HD also features auto-sensing. It senses the device being used and automatically switches the TV to the appropriate input, switching it back when the device is unplugged.

A single HDMI cable connection to the TV means installation is simple and easy. The MediaHub HD is compatible with any TV that has an available HDMI port.

Connection Ports for the Guest

- A** Composite Audio/Video
- B** S-Video
- C** Mini Stereo Jack
- D** VGA (RGB)
- E** HDMI
- F** USB (5v) Power
- G** Bluetooth (wireless audio)

MediaHub™

MediaHub Active™ | with Auto Sensing

When coupled with a compatible TV brand, this auto sensing/switching, easy-to-use entertainment connection hub lets your guests take full advantage of their room's TV by accessing it for all their electronic devices. It senses the device being used and automatically switches the TV to the appropriate input, switching it back when the device is unplugged.

MediaHub Standard™ | with Channel Mapping

The MediaHub Standard also allows your guests to connect all their electronic devices to the in-room TV. This cost-saving option features channel mapping instead of auto-sensing. The guest uses the TV remote to switch the TV channel to the input channel of the device they want to use. An optional acrylic DeskCard is perfect for providing the designated channel mapping.

All the entertainment features of the MediaHub **plus power and data**

A Power plug outlet
B Internet jack

The MediaHub Extender and the PowerHub can be ordered with these plug configurations:

USA 110V
UK 220-240V
EU 220-240V
CHINESE 220-240V
UNIVERSAL 220-240V

MediaHub Extender™

The MediaHub Extender™ offers the same endless connectivity and entertainment possibilities as our other MediaHub products, while providing the convenience of extra power and data outlets as well. Available in HD, Active and Standard, the MediaHub Extender gives you the added flexibility of installing the MediaHub and the PowerHub™ separately.

PowerHub™

Install the Extender as **one elegant unit...**

...or two **space-saving devices**

Providing your hotel guests with extra power and data is always a convenience, but sometimes installing them together is a challenge. Maybe the space you have is just too tight. The MediaHub Extender gives you the option to install just the MediaHub connectivity panel in one area, and the PowerHub with outlets and data in another. You have the flexibility to design what works best for your guests.

Choose the perfect trim to fit any decor...

Standard Trims

Rectangular Silver/Black

Rectangular Black

Custom Trims

Curved Brushed Aluminum

Curved Aluminum | Gloss Gray

Curved Aluminum | Gloss White

Curved Aluminum | Gloss Black

A | VGA Male to Male with Phono Cable

Connects your guest's laptop or video to the in-room TV

B | Retractable USB to Mini USB Cable

Your guests can charge their BlackBerry® and other USB powered devices.

C | Audio/Video Kit

Guests can play their own music, videos and games from an iPod®, MP3 player, game console, or laptop through the in-room TV.

D | Audio/Video iPod Cable

Lets guests play music and videos from their iPod/iPhone through the in-room TV.

Guests often arrive with **electronic devices...**

...but forget **the cables**

ConnectKit™

The ConnectKit features the cables your guests need to connect their electronics to the MediaHub. The kit is available in a beautifully crafted compartmented box, with your choice of a high gloss or leather finish. Or, choose a soft zip bag. Each cable can be purchased separately, packaged and ready to sell through the mini-bar, concierge, or room service. We can even customize the box with your property's logo.

Mounting options... with and without a flatscreen TV...

Whether your property is in the planning stage, going through renovation, or you're just upgrading your rooms, don't forget the most important feature... the in-room entertainment connection panel. The in-room entertainment system isn't complete without it. Let us help you choose the perfect mounting option for your needs.

Wall Mount

All MediaHub products can be easily flush mounted into the hotel room wall, or even a piece of furniture, concealing messy wiring while presenting the guest with a clean easy-to-access panel. For more information talk to your TeleAdapt sales representative.

Desktop

Our optional desktop housing is sold separately and converts the MediaHub into an attractive, self-contained unit that sits conveniently on a desk or any table top. For more information talk to your TeleAdapt sales representative.

avComplete™

avComplete™ by Vantage Point is a clean, simple method for mounting the MediaHub with a flatscreen TV. Eliminate messy wiring with this space saving system. Includes a flat panel mount, sleek wire management channel, and component shelf. Tapered brackets create a floating appearance to the shelf and is a convenient home for all portable devices when connecting to the hub.

The EVO System™

The EVO System made by Vantage Point is a unique method for mounting any flatscreen TV to any wall in any room. The EVO System is designed to hold a flatscreen TV securely 4" off the wall. It is available in a variety of sizes, finishes, and panel colors. It's not only beautiful, but hides every wire. Designing the exact configuration you need is easy.

The H Mount™ System

The H Mount system was designed for close proximity hotel room environments. It merges a flat panel TV with a unique panel design to form one noninvasive TV wall mount unit. Mount any MediaHub product directly into the panel and you have a clean, elegant look that successfully mounts the TV and MediaHub, while concealing all the wiring. It's a total solution.

Premier Mount

Under 2" deep, this unique low-profile system mounts the flat screen TV to the wall, and the MediaHub directly to the TV. Built-in lateral shift allows precise placement, while the innovative Griplate™ System eliminates the need for excessive torque on the mounting hardware. It's an elegant solution for upgrading to a flatscreen TV, and providing connectivity for your guests.

ZVOX Z-Base 550

The Z-Base 550 is a single-cabinet surround sound system designed to act as a base platform for most 26"-50" flat panel TVs, complete with speakers, amplifier, virtual surround technology and powered subwoofer. With an integrated MediaHub option guests can enjoy personal video and music selections in the room with amazing quality.
